

GUNASEKARAN SELVARASU

Senior Software Engineer – Frontend

Chennai, India • +91 897 322 1644 • sguna0100@gmail.com • linkedin.com/in/gunasekaran-selvarasu

PROFESSIONAL SUMMARY

Results-driven **Senior Frontend Engineer** with **5+ years of experience** architecting high-traffic, scalable web applications using **React.js, Next.js, TypeScript, and modern JavaScript (ES6+)**. **AWS Certified Cloud Practitioner** with deep technical expertise in cloud infrastructure optimization, micro-frontends, automated CI/CD pipelines, and enterprise-grade state management. Proven track record of leading agile engineering squads, establishing robust code-review standards, and reducing frontend latency across SaaS, fintech, and e-commerce platforms.

TECHNICAL SKILLS

Core & Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, Modern React.js (Hooks, Context API), Next.js (App Router, SSR, SSG, ISR), Responsive Web Design

State Management & Architecture: Redux Toolkit, Context API, Zustand, Micro-Frontends, Component-Driven Architecture

UI Libraries & Styling: Tailwind CSS, Material UI (MUI), Ant Design, Bootstrap, Styled Components, Web Accessibility (a11y)

Cloud & DevOps (AWS): AWS Amplify, EC2, S3, CloudFront, Route 53, RDS, AWS WAF, ACM (SSL/TLS), Load Balancing, Auto-Scaling, CI/CD Pipelines, GitHub Actions, AWS CodePipeline

Integrations & Protocols: RESTful APIs, GraphQL, WebSockets, Payment Gateways (RazorPay, PayPal), OAuth, OTP Authentication

Performance & Optimization: Core Web Vitals Optimization (FCP, LCP, CLS), Code Splitting, Bundle Analyzer, Lazy Loading, Technical SEO, Cross-Browser Compatibility

Tools & Methodologies: Agile/Scrum, JIRA, Git, GitHub, GitLab, Bitbucket, Postman, Code Reviews, QA Best Practices

CERTIFICATIONS

AWS Certified Cloud Practitioner – Amazon Web Services

PROFESSIONAL EXPERIENCE

Senior Software Engineer (Frontend) | Doodleblue Innovations Pvt Ltd, Chennai **June 2025 – April 2026**

- Mentored a squad of frontend engineers and instituted automated linting and PR review standards, cutting pull-request turnaround time by 30% and reducing regression bugs by 22%.
- Architected enterprise-grade React.js and TypeScript core modules across client platforms, boosting reusable component adoption to 65% and accelerating release cycles by 25%.
- Collaborated with backend squads to optimize RESTful API payloads and hydration strategies, achieving a 40% reduction in First Contentful Paint (FCP) and accelerating feature delivery velocity by 20%.
- Restructured AWS cloud resource allocation (CloudFront edge caching and S3 static asset delivery), cutting infrastructure overhead by 18% while sustaining 99.95% application uptime.

Software Developer (Frontend) | W2S Solutions Pvt Ltd, Chennai **January 2024 – May 2025**

- Engineered cloud-native web applications using Next.js (SSR/SSG) and React.js, scaling platforms to support 150k+ monthly active users with zero downtime.
- Led AWS infrastructure right-sizing initiatives across EC2 instances and load balancers, driving a 24% reduction in monthly cloud expenditure.
- Integrated mission-critical third-party REST APIs and event-driven state patterns, improving client API response rendering time by 35% across high-traffic workflows.

Senior Programmer Analyst | Genxlead Solutions Pvt Ltd, Chennai **November 2023 – December 2023**

- Spearheaded end-to-end frontend sprint delivery for consulting clients using React.js and TypeScript, completing 100% of scoped deliverables ahead of target deadlines.
- Implemented latency-reduction optimizations across AWS deployment pipelines, decreasing page load latency by 28%.

Programmer Analyst | Touchmark Descience Pvt Ltd, Chennai

August 2020 – August 2023

- Delivered and maintained 10+ client web applications with React.js and Next.js, elevating Lighthouse performance scores from 62 to 94+.
- Boosted overall web application throughput by 35%+ through systematic code-splitting, lazy loading, and AWS EC2/RDS resource optimization.
- Configured automated Route 53 DNS routing and S3 asset delivery pipelines, reducing deployment rollback rates to under 1%.

KEY PROJECTS

Asian School of Business (ASB) | *Next.js, Redux Toolkit, TypeScript, REST APIs*

- Architected state management using Redux Toolkit and Next.js SSR, reducing client-side bundle size by 30% and accelerating page transitions across high-volume portal modules.
- Directed GitHub branch protections, automated CI workflows, and code quality benchmarks across 5 developers to maintain zero critical defects during major production launches.

Meii AI Platform | *TypeScript, React.js, Ant Design, Bootstrap, AWS*

- Built a modular, accessible UI system in React.js and TypeScript, driving a 40% gain in cross-team component reusability and reducing front-end development time for future features by 2 weeks.
- Configured optimized RESTful API streams and AWS hosting parameters, handling concurrent real-time data visualizations with sub-100ms latency.

E-Commerce Suite (RadPrix, Velaan Mandi, Sofa33) | *React.js, Next.js, Tailwind CSS, AWS*

- Built high-conversion cart and checkout funnels integrated with RazorPay and PayPal, processing multi-currency transactions with a 99.8% payment success rate.
- Deployed auto-scaling AWS EC2 clusters paired with CloudFront CDN, Route 53, and AWS WAF, successfully mitigating peak flash-sale traffic spikes without downtime.

GS Audit Report System | *React.js, Material UI, Chart.js, AWS Amplify*

- Developed an interactive analytics dashboard utilizing Chart.js to render 10,000+ real-time audit data points with instant zero-lag filtering.
- Configured AWS S3 bucket encryption policies and AWS Amplify CI/CD pipelines, automating secure releases and cutting build deployment times by 50%.

Dgiverse Web Application | *TypeScript, Next.js, Material UI, AWS*

- Implemented Next.js Server-Side Rendering (SSR) to replace heavy client-rendered views, slicing initial Time to Interactive (TTI) by 45% and boosting SEO search visibility.

Corporate Web Ecosystem (Touchmark, HireMe, Origin, SriMurugan, Rupini's, Raincentre) | *React.js, AWS*

- Delivered 6 enterprise corporate portals backed by dynamic CMS feeds, ensuring 99.9% global availability via AWS CloudFront CDN edge caching and SSL certification.

EDUCATION

Master of Computer Applications (MCA) – E.G.S. Pillay Engineering College, Nagapattinam

CGPA: 8.95 / 10.0

Bachelor of Computer Applications (BCA) – E.G.S. Pillay Arts and Science College, Nagapattinam

79.5%
