PROFESSIONAL SUMMARY

Senior Frontend Engineer with 5+ years architecting high-traffic, scalable web applications in React.js, Next.js, TypeScript, and modern JavaScript (ES6+). AWS Certified Cloud Practitioner with hands-on expertise in component architecture, performance optimization (Core Web Vitals), and CI/CD-driven delivery across SaaS, fintech, and e-commerce platforms. Proven record leading frontend engineering squads, setting code-review and testing standards, and cutting release cycle time and page-load latency at scale.

KEY SKILLS & COMPETENCIES

Frontend: React.js (Hooks, Context API), Next.js (App Router, SSR/SSG/ISR), TypeScript, JavaScript (ES6+), HTML5, CSS3, Responsive Web Design

State Management & Architecture: Redux Toolkit, Context API, Zustand, Micro-Frontends, Component-Driven Architecture

UI Libraries & Styling: Tailwind CSS, Material UI (MUI), Ant Design, Bootstrap, Styled Components, Web Accessibility (a11y)

Cloud & DevOps (AWS): Amplify, EC2, S3, CloudFront, Route 53, RDS, WAF, ACM/SSL, Load Balancing, Auto-Scaling, GitHub Actions, AWS CodePipeline

Integrations: RESTful APIs, GraphQL, WebSockets, OAuth, OTP Authentication, Payment Gateways (RazorPay, PayPal)

Performance & Quality: Core Web Vitals (FCP, LCP, CLS), Code Splitting, Lazy Loading, Bundle Analysis, Technical SEO, Cross-Browser Compatibility

Process & Tools: Agile/Scrum, JIRA, Git/GitHub/GitLab/Bitbucket, Postman, Code Reviews, Mentoring

PROFESSIONAL EXPERIENCE

Senior Software Engineer (Frontend) | Doodleblue Innovations Pvt Ltd | Chennai *Jun 2025 – Apr 2026*

- Mentored a squad of frontend engineers and instituted automated linting and PR review standards, cutting pull-request turnaround time by 30% and reducing regression bugs by 22%.
- Architected enterprise-grade React.js and TypeScript core modules across client platforms, boosting reusable component adoption to 65% and accelerating release cycles by 25%.
- Collaborated with backend squads to optimize RESTful API payloads and hydration strategies, achieving a 40% reduction in First Contentful Paint (FCP) and 20% faster feature delivery.
- Restructured AWS cloud resource allocation (CloudFront edge caching, S3 static asset delivery), cutting infrastructure overhead by 18% while sustaining 99.95% application uptime.

Software Developer (Frontend) | W2S Solutions Pvt Ltd | Chennai *Jan 2024 – May 2025*

- Engineered cloud-native web applications using Next.js (SSR/SSG) and React.js, scaling platforms to support 150k+ monthly active users with zero downtime.
- Led AWS infrastructure right-sizing across EC2 instances and load balancers, driving a 24% reduction in monthly cloud expenditure.
- Integrated mission-critical third-party REST APIs and event-driven state patterns, improving client API response rendering time by 35% across high-traffic workflows.

Senior Programmer Analyst | Genxlead Solutions Pvt Ltd | Chennai *Nov 2023 – Dec 2023*

- Spearheaded end-to-end frontend sprint delivery for consulting clients using React.js and TypeScript, completing 100% of scoped deliverables ahead of target deadlines.
- Implemented latency-reduction optimizations across AWS deployment pipelines, decreasing page load latency by 28%.

Programmer Analyst | Touchmark Descience Pvt Ltd | Chennai *Aug 2020 – Aug 2023*

- Delivered and maintained 10+ client web applications with React.js and Next.js, elevating Lighthouse performance scores from 62 to 94+.
- Boosted overall web application throughput by 35%+ through systematic code-splitting, lazy loading, and AWS EC2/RDS resource optimization.
- Configured automated Route 53 DNS routing and S3 asset delivery pipelines, reducing deployment rollback rates to under 1%.

KEY PROJECTS

Asian School of Business (ASB) | Next.js, Redux Toolkit, TypeScript, REST APIs

- Architected state management using Redux Toolkit and Next.js SSR, reducing client-side bundle size by 30% and accelerating page transitions across high-volume portal modules.
- Directed GitHub branch protections, automated CI workflows, and code quality benchmarks across 5 developers to maintain zero critical defects during major production launches.

Meii AI Platform | TypeScript, React.js, Ant Design, Bootstrap, AWS

- Built a modular, accessible UI system in React.js and TypeScript, driving a 40% gain in cross-team component reusability and cutting front-end development time for future features by 2 weeks.
- Configured optimized RESTful API streams and AWS hosting parameters, handling concurrent real-time data visualizations with sub-100ms latency.

E-Commerce Suite (RadPrix, Velaan Mandi, Sofa33) | React.js, Next.js, Tailwind CSS, AWS

- Built high-conversion cart and checkout funnels integrated with RazorPay and PayPal, processing multi-currency transactions with a 99.8% payment success rate.
- Deployed auto-scaling AWS EC2 clusters paired with CloudFront CDN, Route 53, and AWS WAF, mitigating peak flash-sale traffic spikes without downtime.

Agentic AI Job Application Automation System | LangGraph, Django, Celery, Playwright, React (Personal Project)

- Designed a four-agent architecture (Scraper, Evaluator, Tailor, Executor) orchestrated with LangGraph to automate end-to-end job discovery, evaluation, and application workflows.
- Built the React front end and Django/Celery backend, applying the same component-driven and API-integration practices used in production client work.

Zova Canteen | HTML, CSS, JavaScript, Node.js, MySQL (Personal Project)

- Built a full-stack canteen ordering/e-commerce web app end-to-end, covering menu browsing, cart, and order flow on a vanilla HTML/CSS/JavaScript front end.
- Developed the Node.js backend and MySQL schema to handle order processing and persistence, rounding out full-stack ownership alongside the React-based projects above.

CERTIFICATIONS

- AWS Certified Cloud Practitioner – Amazon Web Services

EDUCATION

- Master of Computer Applications (MCA) – E.G.S. Pillay Engineering College, Nagapattinam — CGPA 8.95/10.0
- Bachelor of Computer Applications (BCA) – E.G.S. Pillay Arts and Science College, Nagapattinam — 79.5%
